General Comments

No cable work in the field today. Cable work on suspender brackets was possible today, but ABF ended up not working on this item today. I verified a few times today that they were not doing any work on this item.

INSPECTOR OT REMARK:

Field & Office 8 hours: ABF ironworkers are working a regular 10-hour shift today, but it is a State Holiday today for CT for Cesar Chavez Day (observed). Cable work on suspender brackets was possible today, but ABF ended up not working on this item today. In the office, I am organizing and adding notes to various Dyson material certs and METS documents for cable items, including PWS anchor rods and saddle tie rods. Getting these documents in order is a priority with management considering additional testing of these materials.
